Career Opportunity: Landscape Horticulturist

Job Title:

Landscape Horticulturist

No. of Openings:

2

Location:

Varthur, Bengaluru

Roles & Responsibilities:

- Conducting research to develop new plant varieties that are resistant to disease or drought, for example.
- Planting, cultivating, and harvesting crops to ensure maximum yield.
- Conducting research on soil composition, irrigation methods, pest control techniques, and other factors that affect plant growth.
- Monitoring insect populations to determine when pesticides or other treatments are needed.
- Conducting environmental impact assessments to determine if proposed construction projects will have any impact on the surrounding environment or wildlife habitats.
- Evaluating plants for signs of stress, disease, or other problems.
- Consulting with customers about the selection of plants suitable for their needs.
- Planting and maintaining plants in nurseries where new plants are grown before being sent to the layout.
- Recommending new planting designs or layouts based on client needs, available space, sunlight requirements, and other considerations.
- Knowledge of the characteristics, growth habits, and proper cultivation of a wide selection of vegetable plants and flowering bulbs, annuals, biennials, and perennial plant materials, including both herbaceous and woody plants.
